

Observations

- SK** small increase in the number of new cases (1C), without increase in the number of new deaths - increase in the number of active cases (7R) and inflection of active cases tendency (8L,8R)
- IT** steady reduction on the daily variation of new cases (1C) aligned with other countries tendency. Active "break" (7L) and slow inflection on active cases (8L, 8R) mainly by new deaths - very low reported reduction of active cases (<0.5%). Steady increase of number of tests to cases ratio (1R)
- FR** small increase in the number of new cases (1C), without increase in the number of new deaths - increase in the number of active cases (7R) and inflection of active cases tendency (8L,8R)
- DE** small increase in the number of new cases (1C), without increase in the number of new deaths - increase in the number of active cases (7R) and inflection of active cases tendency (8L,8R)
- ES** recovered cases are not being reported, no active cases reliable information (7, 8)
- US** small increase in the number of new cases (1C), without increase in the number of new deaths - increase in the number of active cases (7R) and inflection of active cases tendency (8L,8R)
- UK** recovered cases are not being reported, no active cases reliable information (7, 8)
- DK** steady reduction on the daily variation of new cases (1C) aligned with other countries tendency. Active "break" (7L) with a reduction of the active cases (7R) and visible inflection on active cases (8L, 8R). Steady increase of number of tests to cases ratio (1R)
- BR** on WATCH - steady tendency (1C, 4L, 4R) of new cases and new deaths (5L, 5R)
- PT** small increase in the number of new cases (1C), without increase in the number of new deaths - increase in the number of active cases (7R) and inflection of active cases tendency (8L,8R)
- NG** limited analysis due to the lack of reliable information for remaining countries. Decreasing tendency on the number of new cases in Nigeria to be confirmed (1C)
- MZ** On WATCH - world and Active number of daily new cases/deaths changing the established reduction tendency (9L, 9R). Start of a reduction in the Watch to World cases ratio (9C)
